FIO policy number is PGA; UIT-194, UITG-194 and UITG-194P.

You could lose money by investing in the money market fund. Although the fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The fund's sponsor has no legal obligation to provide financial support to the fund, and you should not expect that the sponsor will provide financial support to the fund at any time.

MAPPING SCHEDULE

Annuities are long-term retirement saving vehicles.

Income taxes must be paid at withdrawal and a 10% federal early withdrawal tax penalty may apply if you are under age 59½. The early withdrawal tax penalty does not apply to accounts in a 457(b) plan.

Investing involves risk, including the possible loss of principal. Investment values of variable products fluctuate so that investment units, when redeemed, may be worth more or less than their original cost.

- Generally, higher potential returns involve greater risk and short-term volatility. For example, small-cap, mid-cap, sector and emerging funds can experience significant price fluctuation due to business risks and adverse political developments.
- International and global funds can experience price fluctuation due to changing market conditions, currency values, and economic and political climates.
- High-yield bond funds, which invest in bonds that have lower ratings, typically experience price fluctuation and a greater risk of loss of principal and income than when investing directly in U.S. government securities such as U.S. Treasury bonds and bills, which are guaranteed by the government for repayment of principal and interest if held to maturity. Fund shares are not insured and are not backed by the U.S. government, and their value and yield will vary with market conditions.
- Interest rates and bond prices typically move inversely to each other; therefore, as with any bond fund, the value of an investment in this fund may go up if interest rates fall, and vice versa.
- Mortgage-related funds' underlying mortgages are more likely to be prepaid during periods of declining interest rates, which could hurt the fund's share price or yield and may be prepaid more slowly during periods of rapidly rising interest rates, which might lengthen the fund's expected maturity.
- Investors should carefully assess the risks associated with an investment in the fund.

Investors should carefully consider the investment objectives, risks, fees, charges and expenses before investing. This and other important information is contained in the Separate Account and underlying fund prospectuses, which can be obtained from your financial professional, at www.valic.com/prospectusesandreports, or calling 1-800-428-2542 and following the prompts. Read the prospectuses carefully before investing. Policy Form series UIT-194, UITG-194 and UITG-194P.

Securities and investment advisory services offered through VALIC Financial Advisors, Inc. ("VFA"), member FINRA, SIPC and an SEC-registered investment advisor. VFA registered representatives offer securities and other products under retirement plans and IRAs, and to clients outside of such arrangements.

Annuities issued by The Variable Annuity Life Insurance Company ("VALIC"). Variable annuities distributed by its affiliate, AIG Capital Services, Inc. ("ACS"), member FINRA. VALIC, VFA and ACS are members of American International Group, Inc. ("AIG").

American International Group, Inc. (AIG) is a leading global insurance organization. Founded in 1919, today AIG member companies provide a wide range of property casualty insurance, life insurance, retirement products and other financial services to customers in more than 80 countries and jurisdictions.
